

Developing Partnerships  
The EDP Business and Education Award

Langley School's Centre of Excellence in Design, Technology, Engineering and Manufacturing and The Macklow Engineering Group collected awards as finalists in the category of Best Education and Industry Link at the prestigious EDP Business Awards 2008 which was held on the 17<sup>th</sup> October at the Holiday Inn in Norwich. For 19 years now, the EDP Business Awards have been recognising and rewarding excellence in companies/partnerships in Norfolk, North Suffolk and East Cambridgeshire. In addition to the backing of the EDP and support from Porsche Centre Norwich, these Awards have categories sponsored by 11 leading names from the world of business.

Mr Daly, Head of Department and Graham Seery, Director at Macklow developed a partnership based on the sharing of knowledge and expertise in design and manufacturing. Macklow who sponsors the department has provided support to students who have developed projects using advanced manufacturing processes relating to sheet metal fabrication while Mr Daly has worked closely with Macklow to support 3D Design which integrates with their new product portfolio/mixed batch approach to manufacturing. The success of the relationship includes supporting Elle Beattie, Winner of the Tibbenham Award and Thomas Collier, Winner of the Technology Design Innovation Award. Macklow has also set-up a new company to market a number of products developed through the partnership.

Mr Daly Head of Design, Technology, Engineering and Manufacturing and Graham Seery Director of The Macklow Group.
